

16 × 16 dot matrix unit

LUM-2568ML302

The LUM-2568ML302 is a 16 × 16 dot matrix display which can be used in a wide range of applications, including alphabet, numeric, symbol and graphical displays. A large display can be easily created by arranging a number of these dot matrix displays in an array, and they can be applied to a variety of display purposes. A special controller has display data memory for two screens, and data for each can be written and displayed in turn.

●Applications

Light source for displays
