LA6339M

High-Performance Quad Comparator

The LA6339M is a high-performance quad comparator that is capable of operating from a single power supply over a wide range of 2V to 36V. Because of its excellent input characteristics and low power, it can be very conveniently applied to multisignal parallel comparator circuits that require high-density assembly.

Features

- Wide supply voltage range (Single supply: 2.0 to 36.0V, dual supplies: ±1.0 to ±18.0V)
- Wide common-mode input voltage range (0 to V_{CC}−1.5V)
- Open collector output enabling wired OR
- Small current dissipation (0.8mA/V_{CC}=5V, R_L=∞) and low power
- Mini flat package enabling compactness of sets

Maximum Ratings/T_a=25°C
