

LA6530M

2-channel Bridge Driver for CD and CD-ROMs

Overview

The LA6530M is a 2-channel bridge (BTL) driver which was developed for compact discs and CD-ROMs.

Features

- High output current (I_O max = 0.7 A).
- Wide operating voltage range (4 to 15 V).
- Small input bias current.

Package Dimensions

unit : mm

3073A-MFP30SD

Specifications

Maximum Ratings at $T_a = 25^\circ\text{C}$

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage	V_{CC} max		16	V
Differential input voltage	V_{ID}	Amplifier 2, amplifier 3	15	V
Common-mode input voltage	V_{ICM}	Amplifier 2, amplifier 3	15	V
Maximum input voltage	V_{INB}	Buffer amplifier	15	V
Mute pin maximum inflow current	I_M max		1.0	mA
Maximum output current	I_O max		0.7	A
Allowable power dissipation	P_d max		0.9	W
Operating temperature	T_{opr}		-20 to +75	$^\circ\text{C}$
Storage temperature	T_{stg}		-55 to +150	$^\circ\text{C}$

■ Any and all SANYO products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your SANYO representative nearest you before using any SANYO products described or contained herein in such applications.

■ SANYO assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO products described or contained herein.

LA6530M

Operating Conditions at $T_a = 25\text{ }^\circ\text{C}$

Parameter	Symbol	Conditions	Ratings	Unit
Recommended supply voltage	V_{CC}		5.0	V
Operating voltage range	$V_{CC\text{ op}}$		4.0 to 15.0	V
Recommended load resistance	R_L	Pin 11 to 20, pin 5 to 26	8.0	Ω

Electrical Characteristics at $T_a = 25\text{ }^\circ\text{C}$, $V_{CC} = 5.0\text{ V}$

Parameter	Symbol	Conditions	min	typ	max	Unit
No-load current drain	I_{CC1}	Mute off pins 7, 22 and 24 connected to GND	5	10	20	mA
	I_{CC2}	Mute on pins 7, 22 and 24 connected to GND	3	7	15	mA
	I_{CC3}	Mute off pins 7, 22 and 24 connected to $1/2 V_{CC}$	10	20	30	mA
	I_{CC4}	Mute on pins 7, 22 and 24 connected to $1/2 V_{CC}$	4	8	16	mA
Output offset voltage	V_{OF1}	OUT1-OUT2	-50		+50	mV
	V_{OF2}	OUT4-OUT3	-50		+50	mV
Input-output voltage difference	V_{BIO}	Buffer amplifier	-30		+30	mV
Input voltage range	V_{BICM}	Buffer amplifier	1.5	$V_{CC}-1.5$		V
Common-mode input voltage range	V_{ICM}	Amplifier 2, amplifier 3	1.0	$V_{CC}-1.5$		V
Input bias current	I_B			50	300	nA
Output voltage	V_O	8 Ω load between pins 11 — 20, 5 — 26	2.8	3.3		V
Bridge output voltage difference	V_{OD}	8 Ω load between pins 11 — 20, 5 — 26	1.8	2.2		V
Closed-circuit voltage gain	V_G	Specified Test Circuit, $f = 1\text{ kHz}$	30	38		dB
Mute on voltage	V_M			0.7		V
Mute pin inflow current	I_M			3.0		μA

*Thermal shutdown function built in.

Notes:

- When the muting function is on, the OUT1 to OUT4 outputs are turned off and the buffer output is not turned off.
- This IC must be handled carefully owing to its susceptibility electrostatic discharge damage.

- For I_{CC1} to 4, measure the circuit current.
- For V_{OF1} and 2, measure the voltage between pins 11 and 20 and the voltage between pins 5 and 26.
- For V_{BIO}, measure the voltage between pins 7 and 6.
- For I_B, measure the voltage across the 100 kΩ resistor.
- For V_O, measure the voltage on pins 11, 20, 5 and 26 by switching the input pin voltage to 0.5 V and 4.5 V, respectively.
- For V_{OD}, measure the voltage between pins 11 and 20 and the voltage between pins 5 and 26.
- For V_G, measure the voltage on pins 11, 20, 5 and 26 at f = 1 kHz, and use the following formula:

$$VG = 20 \log V_O/V_1 \text{ dB.}$$
- V_M is the mute voltage when the mute voltage is varied and the output is turned off.

Test Circuit

- Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
