

**LB1646****VCR Reel Motor Controller****Overview**

The LB1646 is a bidirectional motor driver IC. Since it has a 2-input logic circuit and performs the functions of bidirectional driving and braking, it is capable of direct driving 6V, 9V, 12V motors.

The output voltage can be varied by using an external Zener diode and the output current can be limited at the time of overload.

Features

- 2-input logic can be used to exercise control of bidirectional driving and braking.
- Input connectable direct to MOS LSI.
- Output voltage variable by use of external Zener diode.
- On-chip output current limiter.
- On-chip minimum output voltage control circuit.
- Variable output current limit slope.
- On-chip circuit to turn ON/OFF the output current limit function.

Package Dimensions

unit:mm

3023A-SIP14H**Specifications****Absolute Maximum Ratings at Ta = 25°C**

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage	$V_{CC \max}$		25	V
Input voltage	V_{IN1}	V_{IN1} , V_{IN2} INH pin	-0.3 to V_{CC}	V
	V_{IN2}	V_L , R_R pin	-0.3 to V_{ref}	V
Output current	I_{OUT}		± 1.6	A
Allowable power dissipation	$P_d \max$	No heat sink	3.6	W
Operating temperature	T_{opr}		-25 to +75	°C
Storage temperature	T_{stg}		-55 to +125	°C

Allowable Operating Conditions at Ta = 25°C

Parameter	Symbol	Conditions	Ratings	Unit
Supply voltage	V_{CC}		7 to 25	V

■ Any and all SANYO products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your SANYO representative nearest you before using any SANYO products described or contained herein in such applications.

■ SANYO assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO products described or contained herein.

Electrical Characteristics at $T_a = 25^\circ\text{C}$, $V_{CC}=12\text{V}$

Parameter	Symbol	Conditions	Ratings			Unit
			min	typ	max	
Input threshold voltage	V_{th}	V_{IN1}, V_{IN2}, INH	1.0	1.4	2.0	V
Input current	I_{IN}	$V_{IN1}, V_{IN2}, INH=10\text{V}$	0.10	0.17	0.25	mA
Output voltage	V_O	$I_{OUT}=100\text{mA}, V_Z=7.0\text{V}$	6.0	6.8	7.5	V
Output leakage current	I_{OL}	$V_{IN1}, V_{IN2}=0\text{V}$			10	mA
Current dissipation	I_{CC}	$V_{IN1}, V_{IN2}=0\text{V}$	9.5	14.5	19	mA
Saturation voltage (upper)	V_{sat1}	$I_{OUT}=300\text{mA}$			2.2	V
		$I_{OUT}=500\text{mA}$			2.3	V
Saturation voltage (lower)	V_{sat2}	$I_{OUT}=300\text{mA}$			0.5	V
		$I_{OUT}=500\text{mA}$			0.65	V
Limit voltage	V_L	$V_L=3.0\text{V}$	2.8	3.2	3.6	V
V_Z flow-out current	I_{VZ}	$V_Z=7\text{V}$	1.1	1.6	2.1	mA
Current limit start voltage	V_{RCD}	$V_O=9\text{V}, R_S=2.0\Omega, R_R=1\text{V}, V_{CC}=15\text{V}$	425	460	493	mV
Current limit start voltage	ΔV_{RCD}	$V_O=9\text{V to }4\text{V}, R_{CD}=2.0\Omega, R_R=1\text{V}, V_{CC}=15\text{V}$	32	42	52	mV
Reference voltage	V_{rdf}	$I_{ref}=500\mu\text{A}$	5.8	6.2	6.6	V

Equivalent Circuit Block Diagram

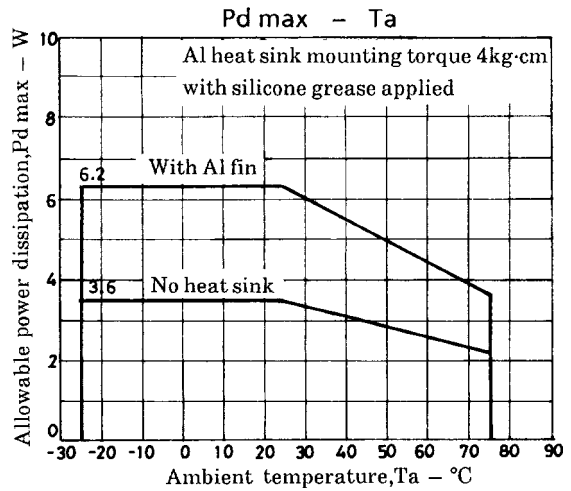

LB1646

Pin Functions

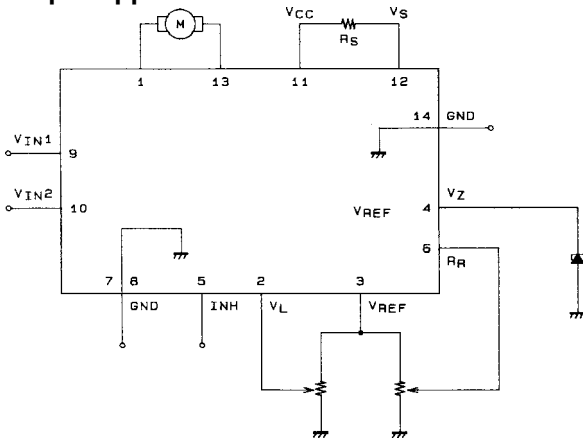

Pin No.	Pin Name	Function
1	OUT1	Output pin1. When V_{IN1} is brought to high level, Out1 is at a high voltage level relative to OUT2.
2	V_L	Minimum voltage control pin. Controls a minimum value of output voltage at the current control mode.
3	V_{REF}	Reference voltage output pin. Regulated power source for supplying voltage for V_L , R_R .
4	V_Z	Zener pin. Controls the output voltage. The voltage on pin is almost equal to the output voltage.
5	INH	Current free inhibit pin. When this pin is brought to high level, the output current is limited by a present value.
6	R_R	Slope control pin. Controls the output current Vs. Output voltage slope at the current control mode.
7, 8	GND	GND. Control section GND.
9	V_{IN1}	Input pin1. When brought to high level, output pin OUT1 is at a high voltage level relative to OUT2 (Refer to Logic Diagram).
10	V_{IN2}	Input pin2. When brought to high level output pin OUT2 is at a high voltage level relative to OUT1 (Refer to Logic Diagram).
11	V_{CC}	Power source voltage supply pin.
12	V_S	Current detect pin. By connecting a resistor across V_S and V_{CC} and setting its value, a limit start current can be obtained. Limit start current= V_{OL}/R_S .
13	OUT2	Output pin2. When V_{IN2} is brought to high level, OUT2 is at a high voltage level relative to OUT1.
14	GND	GND. Power section GND. Connected to pins 8, 9 internally.

Logic Section Truth Table

V_{IN1}	V_{IN2}	OUT1	OUT2
0	0	L	L
1	0	H	L
0	1	L	H
1	1	L	L

Sample Application Circuit

Sample Application Characteristics

- Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any and all SANYO products described or contained herein fall under strategic products (including services) controlled under the Foreign Exchange and Foreign Trade Control Law of Japan, such products must not be exported without obtaining export license from the Ministry of International Trade and Industry in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of SANYO Electric Co., Ltd.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO product that you intend to use.
- Information (including circuit diagrams and circuit parameters) herein is for example only ; it is not guaranteed for volume production. SANYO believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringements of intellectual property rights or other rights of third parties.
