

# High speed thermal printhead (8 dots / mm)

## NB2004-VA10A

The NB2004-VA10A is a flat thin-film thermal printhead capable of printing speeds up to 12 inch / second, and suited for general purpose compact printers as well as label printers.

### ●Applications

Bar code label printers

Ticket printers

General purpose compact printers

### ●Features

- 1) Special glazed components for high speed, high quality printing.
- 2) High speed clock (10MHz) to facilitate external heat history control.
- 3) Using a hard conductive film as a protective film on the heating element offers excellent resistance to electrostatic damage.
- 4) Compatible with the NB3004-VA10A (300 dpi) in mechanical specifications, to facilitate the making of a series of printers.

### ●External dimensions (Units: mm)

Note: No heat history control function inside the thermal printhead. External heat history control is required for high speed printing.
