# High speed thermal printhead (300 dots / inch)

# NB3002-VA10A

The NB3002-VA10A is a flat thin-film thermal printhead capable of printing speeds up to 10 inch / second, and suited for general purpose compact printers as well as label printers.

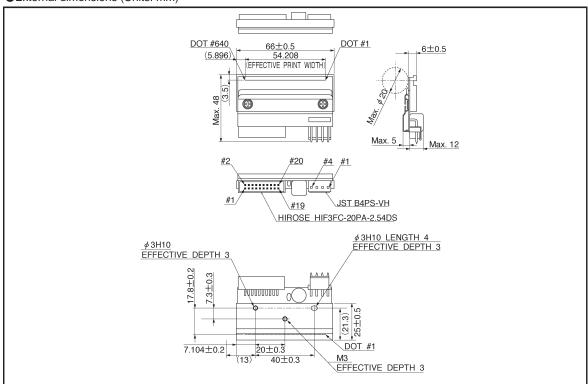

### Applications

High definition bar code label printers High definition ticket printers General purpose compact printers

### Features

- 1) High resolution of 300 dots/inch.
- 2) Special glazed components for high speed, high quality printing.
- 3) High speed clock (10MHz) to facilitate external heat history control.
- Using a hard conductive film as a protective film on the heating element offers excellent resistance to electrostatic damage.
- 5) Compatible with the NF2002-VA10A (8 dots/mm) in mechanical specifications, to facilitate the making of a series of printers.

### External dimensions (Units: mm)

Note: No heat history control function inside the thermal printhead. External heat history control is required for high speed printing
