Near edge thermal printhead (8 dots / mm)

NE2002-VA10A

The NE2002–VA10A is a near edge thin–film thermal printhead, where the printing medium passes straight through at printing speeds up to 10 inch / second. It is suited for high–speed label printers.

Applications

Bar code label printers Card printers

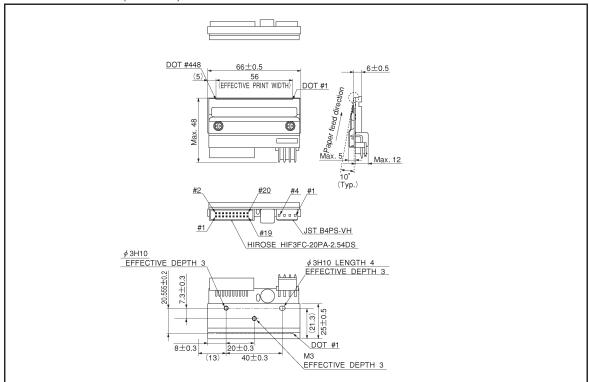

Ticket printers

General purpose compact printers

Features

- Inclined toward the printing surface to provide excellent printing quality even for cards and thick paper.
- 2) Prints directly on printing medium that cannot be bent.
- 3) Using a hard conductive film as a protective film on the heating element offers excellent resistance to electrostatic damage.
- 4) Being low-profile when installed enables smaller printers.
- Compatible with the NE3002-VA10A (300 dpi) in mechanical specifications, to facilitate the making of a series of printers.

External dimensions (Units: mm)

Note: No heat history control function inside the thermal printhead. External heat history control is required for high speed printing.

Characteristics

Parameter	Symbol	Typical	Unit
Effective printing width	_	56	mm
Dot pitch	_	0.125	mm
Total dot number	_	448	dots
Average resistance value	Rave	850	Ω
Applied voltage	V _H	24	V
Applied power	Po	0.59	W / dot
Print cycle	SLT	1.5	ms
Pulse width	Ton	0.36	ms
Maximum number of dots energized simultaneously	_	448	dots
Maximum clock frequency	_	10	MHz
Maximum roller diameter	_	_	mm
Running life / pulse life	_	50 / 10 ⁸	km / pulses
Operating temperature	_	5~45	°C
