High speed thermal printhead (8 dots / mm)

NF2003-VA10A

The NF2003-VA10A is a flat thin-film thermal printhead capable of printing speeds up to 12 inch / second, and suited for general purpose compact printers as well as label printers.

●Applications
Bar code label printers
Ticket printers
General purpose compact printers

●Features
1) Special glazed components for high speed, high quality printing.
2) High speed clock (10MHz) to facilitate external heat history control.
3) Using a hard conductive film as a protective film on the heating element offers excellent resistance to electrostatic damage.

●External dimensions (Units: mm)
Note: No heat history control function inside the thermal printhead. External heat history control is required for high speed printing.

●Characteristics

Parameter	Symbol	Typical	Unit
Effective printing width	—	80	mm
Dot pitch	—	0.125	mm
Total dot number	—	640	dots
Average resistance value	Rave	550	Ω
Applied voltage	V_H	24	V
Applied power	P_O	0.899	W / dot
Print cycle	SLT	0.98	ms
Pulse width	T_{ON}	0.267	ms
Maximum number of dots energized simultaneously	—	448	dots
Maximum clock frequency	—	10	MHz
Maximum roller diameter	—	20	mm
Running life / pulse life	—	$50 / 10^8$	km / pulses
Operating temperature	—	5～45	℃
