Reflecting low-dome LEDs, directly mountable (ϕ5.0 mm)

SLR-505 Series

The SLR-505 series are small 5 mm LEDs with a lead pitch of 5 mm which can be directly mounted on a printed circuit board. Two colors and two lens types are available for a total of four types, and they are suitable for use in a wide variety of applications.

●Features

1) Can be directly mounted on a printed circuit board.
2) Available on tape to allow mounting using a 5 mm pitch machine without lead forming.
3) Large flange eliminates wobbling after mounting (stable before and after soldering).
4) The auto insertability and stability of this LED dramatically decreases quality problems during production.
